DETAILED ACTION

1. This office action is in response to the Amendment filed August 15, 2007.

Accordingly, claim 3 was cancelled. Currently, claims 1 and 2 are pending in this application.

Allowable Subject Matter

2. Claims 1 and 2 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly suggests or shows all of the limitations as claimed.

Specifically, re claim 1, none of the prior art of record discloses, in combination with other limitations as claimed, a liquid crystal display device comprising a boundary between the light transmitting region and the light reflecting region shaped rectangular and has two first sides extending in the first direction and two second sides extending in the second direction, wherein at least one of the holding capacitance lines is formed in an overlapped manner to one of the first sides, and is formed of a material having a light shielding property, and wherein the holding capacitance electrode is formed in an overlapped manner to at least one part of the second sides, and is formed of a material having a light shielding property.

The most relevant reference, US 6,912,034 B2 to Nagato et al. (Nagato), fails to disclose or suggest the holding capacitance line formed in an overlapped manner to one of the first sides. As shown in Fig. 6, Nagano only discloses the holding capacitance electrode 25 formed in an overlapped manner to the second side which is parallel to the data line 4, and formed of a material having a light shielding property.
